⚡ Technical Event Name: Code Relay

👥 Team Formation

Each team must consist of 2 members.

Individual participation is not allowed.

🧩 Event Structure

The event consists of 3 rounds designed to test coding skills, teamwork, and coordination between team members.

🔹 Round 1

Duration: 15 minutes

Number of Questions: 2

Participation Rule:

Only one member from each team is allowed to participate in this round.

🔹 Round 2

Duration: 15 minutes

Number of Questions: 2

Participation Rule:

The other team member must participate in this round.

The member who participated in Round 1 is strictly not allowed to participate in Round 2.

🔹 Round 3 (Final Round)

Duration: 40 minutes | Total Questions: 4 (2 questions per participant)

Participation Format:

Each team member will receive a separate coding link for this round.

Each participant must solve 2 questions individually using their respective link

Important Notes:

Both coding sessions will run simultaneously within the same 40-minute duration. No AI tools allowed.

Participants must work only on their assigned link. Need to have a HackerRank Account.

Team must bring their own laptops.

Accessing or modifying the other team member's session is strictly not allowed.
