CODEHIVE 2K26

INNOVATE, CODE, CONQUER

REVERSE GEAR

EVENT DETAILS

This event focuses on analyzing an existing code solution and improving it through redesign, rebuilding, or feature enhancement. Participants will demonstrate their understanding and creativity through coding and explanation.

- **Each team must consist of 2 members. Individual participation is not allowed**
- **Total Working Time: 2 Hours 30 Minutes (within 3-hour event schedule**

ROUND 1: CODE ANALYSIS

- Participants will be given an existing code or solution.
- They must carefully analyze the code to understand its functionality.
- The goal is to identify how the code works and what improvements can be made.

ROUND 2: REBUILD / REDESIGN / FEATURE ADDITION

- Based on the analysis from Round 1, participants can modify the code.
- They can rebuild the logic, redesign the structure, or add new features.
- Participants can choose any improvement based on their creativity.
- The work should be completed within the given time

ROUND 3: EXPLANATION

- Participants must explain their modifications in 1 minute.
- They should describe what changes they implemented.
- They should explain why those changes improve the solution.

GENERAL RULES

- Equipment Participants must bring their own laptops (2 laptops required per team). If a laptop is unavailable, inform the coordinators at registration.
- Session Integrity Each participant must work only on their assigned link/session. Accessing another team member's session is strictly prohibited.
- Fair Play Any violation of the rules may lead to immediate disqualification. All participants are expected to maintain the highest standards of integrity.
- AI Tools Prohibited Using AI tools of any kind is strictly prohibited throughout the competition. Violations will result in immediate disqualification of the entire team.
